CEYLON CINNAMON is the most powerful antioxidant in nature. The Romans used it in their wines, the Hebrews in their religious rituals, now it is widely used in medical industry, both savory and sweet food and beverages.

CEYLON CINNAMON is excellent solution to various health problems. Study shows that cinnamon intake can effectively lower blood sugar level. Some research has been identified cinnamon has effects on blood clotting. Cinnamon is also used to fight fungus and Bactria and some cancer prevention ability of cinnamon also identified.

Ceylon Cinnamon Cinnamomum zeylanicum (syn. Cinnamomum verum) is important due to its low coumarin content. It is approximately 1200 times lower than cassia cinnamon. A person daily consuming sizeable amounts of cassia-type cinnamon, it increases the risk of potential toxicity problems.

These products are naturally processed and hygienically packed at our own production facility to ensure high quality standard up to the packaging stages. The range of products includes Pure Ceylon Cinnamon in Organic & Conventional form. We give you both bulk and in a variety of value-added forms.
